

Hot Car Hazards

High temperatures can endanger motorists and their passengers health.

To make things simple, **LeasePlan UK** have created an easy to follow checklist.

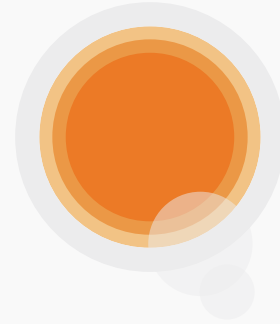

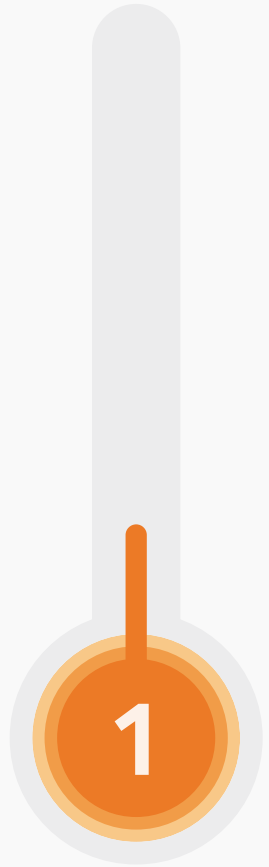

Vulnerable People

Never leave young, elderly or vulnerable people alone in a car.

Even with the window left open the temperature inside a car can end up being double the outside temperature.

The result can be fatal.

Don't Neglect Pets

Never leave a pet locked in a vehicle.

1000 pets are rescued from hot cars every year.

It only takes 30 minutes for a pet to die from heatstroke.

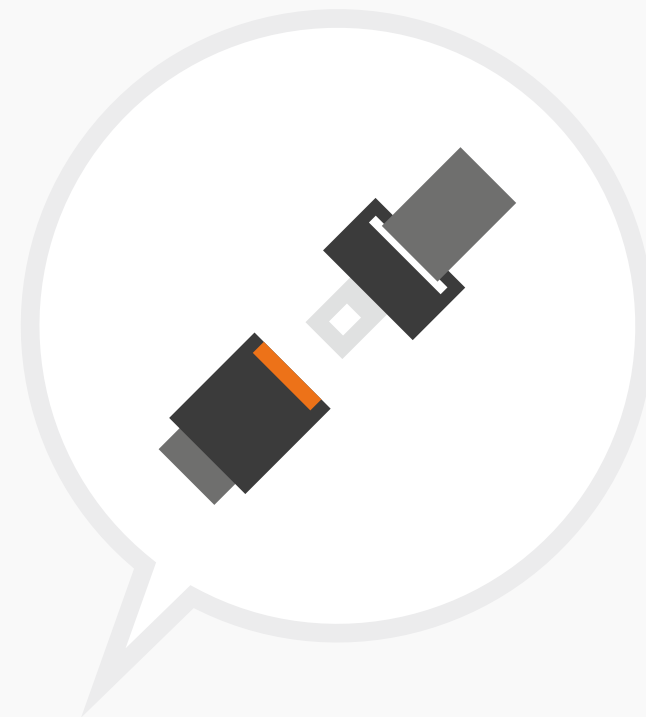

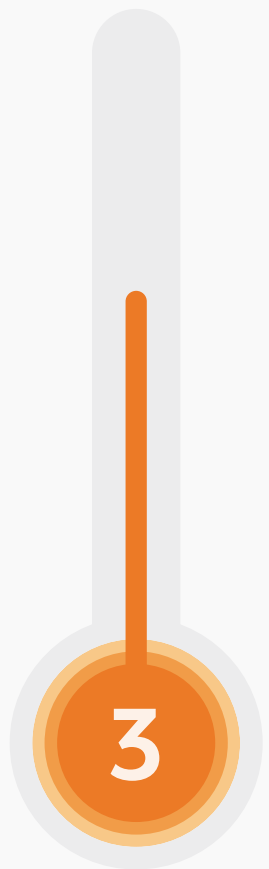

2

Hot Car Seats

Always check the temperature of your children's car seat.

Uncovered buckles on car seats can reach such high temperatures that they cause **second degree burns**.

Keep Hydrated

During summer there is a 146% increase in driver errors due to dehydration and the results are **as deadly as alcohol** for drivers.

Symptoms can cause dizziness, fainting and pose a risk to others.
